---

Good afternoon,

The Pre-RD group is currently at the processing facility decontaminating the carboys in preparation for the next sampling event. Carboys are decontaminated with DI water, then liquinox, DI, methanol, DI, 10% Nitric, and DI water once more. The group is using the peristaltic pump to fill sample jars seen in photo 2. Sample jars are labeled and put into the fridge for storage.

Jonni
